

North Star **Steel Corp.**

**Cut Build Time,
Not Quality.**

Steel structures made easy

Quick Construction, Quality Results

You need a steel building solution that's both fast and reliable, without sacrificing quality. With North Star Steel, we take the guesswork out of construction. Choose from a curated selection of the most popular building products and sizes tailored to your region. Our streamlined approach reduces development time, simplifies the sales process, accelerates delivery, and makes buying and selling easier than ever.

Features You Can Count On

Single Source Provider

North Star Steel is a single-source provider. This ensures consistent quality, comprehensive warranties, and fewer headaches.

Gutter & Downspouts

Standard with every building, gutters and downspouts come included.

Crimped Base Panels

This provides a more durable and reliable solution for your building.

Heavier Designed Steel

North Star Steel buildings are engineered with heavier steel to meet the rigorous demands of your region, ensuring superior durability and performance.

Built Fast. Built to Last.

Our pre-designed steel buildings provide:

Faster Delivery

Get your building delivered in as little as 4 weeks, keeping your project delivery time on track.

Flexibility on Site

Make real-time adjustments to doors and windows during construction without costly delays.

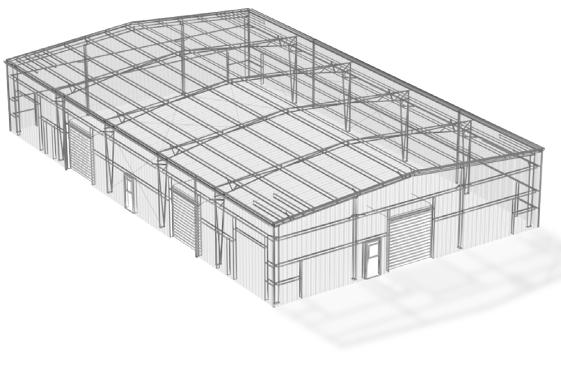

Quality You Can Trust

Every building meets the highest standards of durability and is backed by industry-leading warranties.

Quick Turn Construction Documents

Permits and foundation drawings, anchor rod and reactions are provided four days from completed order.

Easy Field Customization

North Star Steel buildings offer versatility with field-located framed openings, giving customers the flexibility to adjust placement on-site right up until installation.

On-Site Customization

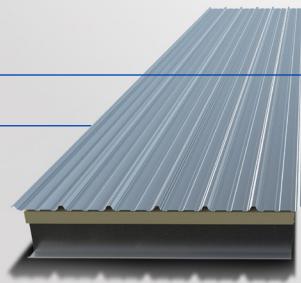

Decide where to place doors and windows during construction.

Easy Installation

Our framed opening kits include all materials for:

- Standard 3' x 7' door openings
- Window or Louver openings up to 4' x 4' with a 3' sill height
- Overhead doors up to 10' x 10' or 16' x 16'

Panel Rib Roof

Panel Rib Wall

Wall-to-Wall Quality

Our Panel Rib crimped base eliminates the need for base trim, speeding up installation and providing a more durable, long-lasting solution. Additionally, the Kynar 500 wall finish sets the industry standard, outperforming lower-grade alternatives. The premium KXL paint system resists fading and chalking. With 70% Kynar®500 or Hylar®5000, KXL ensures exceptional durability and aesthetic longevity. Panel Rib panels are attached to secondary members with a G30 finish, offering a beautiful, clean appearance with superior corrosion resistance.

Choose Your Building Size

Unmatched Flexibility with North Star Steel Select Buildings

Choose a building size that meets your needs. With 24 options to choose from, we're confident you'll find the perfect fit.

Choose your options:

- Walk doors are easy add-ons.
- Choose quantity of doors, hinge side, and hardware.
- Options shipped with your building.

VP Quick Select buildings are offered in the following sizes

Width	Length	Square Feet	Model	Interior Frame Type	Eave Height
